

AUSCOL
THE COOKING OIL UPCYCLERS.

Australia's first and leading national Used Cooking Oil (UCO) upcycling company

Auscol is renowned as an industry leader when it comes to storing, managing and upcycling Used Cooking Oil. In 2020 we celebrate half a century of unrivalled service, commitment to excellence, technological growth and eco-sustainability.

Auscol has a well-established and unrivalled collection network in place extensively covering metropolitan and regional areas, supported by our Liquid Terminals, where product is delivered, refined, heated and stored prior to shipment to both local and export markets.

The majority of Auscol's Used Cooking Oil is shipped by GrainCorp to South East Asia where it is upcycled predominantly into biodiesel for use in the automotive industry. These ships are then back-loaded with valuable imported supplements for Australia's livestock industry.

Auscol provides turnkey services, including the provision of storage tanks, collection and upcycling services for Used Cooking Oil, as well as supporting services including any ad-hoc, urgent and supporting service requirements.

Auscol currently provides commercial upcycling services:

FOR 5,000+ CUSTOMERS

IN EACH AUSTRALIAN STATE

PROVIDING STATE-OF-THE-ART STORAGE TANKS

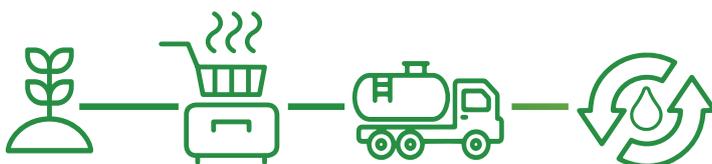

TO AUSTRALIAN RESTAURANTS, FAST FOOD OUTLETS, SHOPPING CENTRES & FOOD MANUFACTURERS

COLLECTING AND UPCYCLING APPROX. 24+ MILLION LITRES OF USED COOKING OIL PER ANNUM

Auscol collects and upcycles more than 24m litres of UCO per year - that's equivalent to 11 Olympic sized pools of oil converted largely into biodiesel.

Eco Vacuum Tanks: 310L Model

Auscol maintains a range of innovative and industry leading Eco Vacuum Tanks, to assist businesses and enhance the way Used Cooking Oil is stored and managed.

FEATURES & BENEFITS

Our mobile 310 Eco Vacuum Tanks have a range of features and benefits which making storing and handling your UCO easier than ever before.

They remove the associated manual handling risks by eliminating pouring, through the innovative vacuum systems incorporated into the designs. This also reduces the risks of spills and potential for burns associated with the handling of hot oil.

These include:

- ✓ **Robust design** – ideal for use in commercial kitchens
- ✓ **Vacuum system** – vacuum from the fryer, reduces the likelihood of spills
- ✓ **Large storage capacity** – reduces collection frequency
- ✓ **Mobile design** – reduces handling, improves safety and ease of collection
- ✓ **Translucent design** – allows tank levels to be monitored
- ✓ **Easy to use** – helps improve productivity
- ✓ **Tanks remain locked** – prevents unauthorised oil removal
- ✓ **90 second auto cut off** – shuts down automatically for convenience

COMPLIANCE

Auscol maintains important certification, accreditation and necessary licencing requirements, giving you confidence your Used Cooking Oil is being managed responsibly:

- ✓ **ISO certification for Quality, Safety and the Environment**
- ✓ **International Sustainability & Carbon Certification (ISCC)**
- ✓ **Feed Safety – Australian Renderers Association (ARA), and**
- ✓ **Required EPA regulatory licences**
